

**Digital Retinal Image + the NEW iWellness Scan**

Our office is committed to providing the best patient care possible. **Our doctors highly recommend this photo as part of your comprehensive eye exam because there is no other way for early detection of potentially harmful changes that can occur over time.**

- Digital Retinal Imaging captures a widefield image of the retina, including the optic nerve, macula and blood vessels in the eye.
- iWellness imaging is a noninvasive scan that lets the doctor see into the deeper layers of the retina, where signs of disease first appear. These layers cannot be seen during a routine eye exam.

Our office offers this service for **\$39.00** and must be paid once your exam is complete. At this time, this service is not covered by your vision insurance. If you have any questions, feel free to ask one of our staff members or doctors before choosing to opt in or out.

- Yes, I accept the doctor's recommendation and agree to have the DRI and scan for \$39
- No, I do not accept the doctor's recommendation and understand the risks by not having the DRI or scan
