

The Optomap (full-field digital image of the retina) will be done annually for every patient

As of March 2022, it is the **STANDARD OF CARE** for all Ages to have a digital image of the retina EVERY year.

Without thorough internal examination, serious eye diseases are missed such as: diabetes, retinal detachment, or cancerous tumors. All these can lead to vision loss, blindness, or even death.
Early detection is crucial!

In our office, this part of the eye exam is the standard of care. A \$39.00 copay will be collected at checkout. If you have any questions please ask one of our staff.
